DATE OF INFO.

See below

25X1X

- Between 7 and 10 February approximately 20,000 Chinese Communist troops moved from Osae-ni (128-28, 38-05) through mountain passes via Chindong-ni (128-28, 38-00) to Togwan-ni (128-06, 37-49). They remained in Togwan-ni for 2 days and then headed toward Wonju (127-56, 37-20). Their food was being supplied by North Korean village guards. The troops were mostly 20-25 years old.
- On 7 February 20,000 North Korean troops who were dug-in on the mountains surrounding Wolchong Temple (128-36, 37-44) in Pyongchang-gun left for an unknown destination, taking with them 10 field artillery pieces.
- Between 7 and 9 February 10,000 North Korean troops from Yanggu (128-00, 38-06) arrived at Choljong-ni (unlocated) via Hasunae-ri (128-03, 38-00). The troops were wearing laborers' fatigues, and were armed with Soviet and Japanese rifles. The troops claimed they trained at Yenchi (129-31, 42-55). The officers and non-commissioned officers have had 3 to 4 years battle experience in China.
- In early February the main route for North Korean and Chinese Communist reinforcements moving southward to the central front was through Maedok-mi (128-33, 38-01), Sorim-mi (128-32, 37-58) and Shinjon-mi (127-07, 37-46). Another route leads through Inje (128-10, 38-04), Hachu-ri (128-17, 38-02) and Wondae-ri (128-14, 38-00). The route used for northward movements by an undetermined number of Chinese Communist troops in mid-February passes east and west of wount Panghwa (128-32, 38-00); this route is frequently used by both North Korean and Chinese Communist troops.
